Career Objective:

Dedicated and highly skilled Full Stack Developer with more than 2 years of experience in designing and implementing complex web applications in an Agile Environment working with a team and contributing in a collaborative manner. Proficient in both back-end and front-end development, I am seeking a challenging Software Engineer position where I can contribute my technical expertise and passion for building things. I am always eager to learn relevant new technologies that comes as a part of development and also expands my skill pool.

Professional Experience:

- **Software Engineer - Impelsys**
(Bengaluru – Full Time | Aug 2021 – Present)

Top Skills: Full-Stack Development · Symfony · React.js · MySQL · Git · Docker · PHP · JavaScript · AWS

- Collaborated with cross-functional teams since the inception of the Project in designing, development and setting up the initial frameworks as designed by the System Architect.
 - Contributed in the backend development of Student Management System, Centers and University Management Systems implementing Programs, Streams, Modules and Curriculums as per the business logic required as a part of the Digital Transformation of our client.
 - Implemented a robust User and Contact Management with different Contact types and permissions associated with them throughout the system, integrated TriKoder OAuth2 for authentication.
 - Collaborated in handling Asset Management utilizing AWS S3, system wide in our application.
 - Lead a small group of developers and contributed simultaneously to make a Calendar Management System with Event Management and Notifications which works independently with the various dashboards (specified above) in our system and are cross functional and interconnected.
 - Worked in Development of Digital Assessment Platform (DAP) for the Client with a wide area of use case domains with different types of assessment types and Marking procedures.
 - Utilized Agile methodologies and tools like JIRA to manage project and tasks, ensuring on-time delivery and Client satisfaction with Continuous Integration and Deployment.
-

- **Intern – LocalBitcoins.com (Arbitrage)**
(Remote – Full Time | Oct 2020 – Nov 2020)

Top Skills: Cryptocurrencies · Third Party APIs · Solidity · Trading · Automation testing · Banking systems.

- Customer Interactions, segregating customers into segments and dealing accordingly through SOP.

- Utilizing third party API endpoints to integrate in our own system to track transactions and other operations in real-time.
- Understanding Blockchain technology, market trends and trading fundamentals in crypto currency.
